

How to Setup a Best Carbon Swivel Bar

The Best Swivel bar is a revolutionary new bar system that allows you to have a leash system without it getting in the way. Spin your bar while it automatically untwists your front lines!

To setup up your Best Swivel Bar (Should only be used with the proper Sleeved Fly Lines)

- Attach your back fly lines to the outside lines of the bar.
- Then attach your front fly lines as seen in the images below.
 - The left front line will attach to the lowest knot.
 - The right front line should pass through the ring then through the small hole of the stopper ball and larks head around the knot on the leash line
